

HOME BARISTA BY LA ROCCA®

HOME BARISTA

BY **LA ROCCA** 

In a corner of the world, where the scent of freshly ground coffee and the gentle melody of milk frothing blend in an aromatic dance, a movement has emerged that promises to conquer the hearts of coffee lovers worldwide: the Home Barista project. This phenomenon is not just a passing fad; it is a real market trend with blossoming potential across the globe, and it is here to stay.

The rise of Specialty Coffees and the increasing sophistication of home coffee machines have given birth to the Home Barista, a passionate and enthusiastic coffee enthusiast who brings the art of barista to the comfort of their own kitchen. These individuals are curious and restless, always eager to learn and experiment. They are the kind of customers who deserve to be nurtured and cared for because their dedication to coffee goes beyond the simple morning routine. They seek advice and information on all things coffee and extraction machinery, and they are willing to invest in their passion to fully enjoy it.

MACHINE & ACCESORIES

Our mission is to provide Home Baristas with a powerful platform to meet their needs and desires. We introduce our gem, the LA RETRO coffee machine, a testament to the craftsmanship and passion we share with our community. In addition, we offer grinders and other essential accessories for coffee preparation and extraction, making us the undisputed stronghold of this new and exciting movement.

SPECIALIZED TRAINING

But we don't stop here. We recognize that the passion for coffee is a constant journey of learning and exploration. That's why we offer personalized and exclusive training for our Home Baristas, providing courses, recipes, and videos to enhance their experience. We invite you to visit our factory, issue certificates for completed courses, and allow customization and personalization of machinery so you can take your love for coffee to the next level.

COMMUNITY

In the La Rocca Home Barista project, we don't just sell coffee machines, grinders, and accessories; we build communities of coffee lovers, foster passion and skill, and create a culture around this beloved beverage. In every cup of coffee prepared at home, in every latte art created with love, and in every perfectly extracted espresso, we see a tribute to the excellence of coffee. This movement is destined to grow, and we are excited to be a part of it, transforming coffee enthusiasts into true coffee artists in their homes.

RETRO

RETRO, MORE THAN A COFFEE MACHINE

Retro is much more than a coffee machine; it's a statement of style, a precision tool, and a source of inspiration for coffee lovers seeking the best in taste and design. With 'Retro,' each cup becomes a tribute to the past and a promise of exceptional coffee in the future.

Whether in a domestic or professional setting, this machine becomes the heart of the space, capturing attention and winning hearts alike. La Rocca's Retro is more than an investment in a coffee machine; it's an investment in perfection, aesthetics, and the pleasure of enjoying each cup.

Whether you crave a bold espresso or a smooth, creamy cappuccino, Retro gives you the versatility you need to become a true Home Barista.

RETRO

E61 GROUP

An essential component in a professional coffee machine, as it ensures temperature stability, effective pre-infusion, and long-term durability. These qualities make coffee machines equipped with an E-61 group a preferred choice for coffee enthusiasts and baristas seeking excellence in every cup they prepare.

3 LITERS BOILER

Significantly contributes to efficiency and quality by ensuring a constant flow of hot water and steam. The ability to consistently and quickly produce steam is essential for creating frothy milk for beverages like lattes and cappuccinos, as well as for heating cups and containers.

THERMOSYPHONIC CIRCULATION

Allows for a constant flow of hot water through the extraction group. It is essential to ensure a uniform and consistent extraction of high-quality espresso.

ELECTRICAL CONTROL SYSTEM

This system is crucial for ensuring coffee quality, as it regulates key parameters such as temperature and pressure, guaranteeing a perfect extraction in every cup. Additionally, it protects the equipment by detecting and preventing malfunctions, extending its lifespan, and adheres to high safety standards to prevent accidents. It also optimizes energy consumption, reducing costs and environmental impact. In short, it is an essential component for maintaining coffee quality, preventing equipment damage, and ensuring safe and efficient operation.

TECHNICAL DATA

Groups	1
Boiler capacity	2,9L
Power (W)	1400W
Steamer	1
Hot water	1
