**TALL CUP**

In the Venezia Series, excellence is not a goal, it's a standard. These machines have been meticulously designed to elevate the professional coffee experience, combining precision engineering, refined aesthetics, and unparalleled ease of use. With a variety of models tailored to different needs, the Venezia Series offers the perfect solution for every barista, every space, and every cup.

From compact efficiency to classic robustness, through essential simplicity or extra-large cups, Venezia embodies a commitment to quality and a passion for coffee.

## VENEZIA COMPACT

### Power and performance in a reduced format

The ideal solution for small spaces without compromising on quality. Its compact design makes it the perfect machine for those looking to optimize their workspace without sacrificing performance.

## VENEZIA CLASSIC

### Everything a professional barista desires

The most versatile version, equipped with all the features a professional barista needs to prepare impeccable coffee. Perfect for those who seek a robust and comprehensive machine.

## VENEZIA ESSENCE

### Simplicity and efficiency without complications

Simplicity and efficiency at its finest. This machine offers a more basic option without losing the quality that defines the Venezia Series. Ideal for those looking for a hassle-free coffee experience.

## VENEZIA TALL CUP

### Pleasure in large format

Specifically designed for XL cup lovers. Its structure allows the preparation and serving of coffee in large-sized cups, without compromising precision or flavor.

# VENEZIA COMPACT

# VENEZIA COMPACT

## Power and performance in a reduced format

Designed for environments where space is a luxury, the Venezia Compact is the perfect choice for cafés or restaurants that need a high-performance machine without taking up large areas. Despite its smaller size, this machine makes no compromises in quality or technology. With its ergonomic design and ability to extract perfect espressos, it is

the ideal combination of efficiency and excellence. The Compact clearly demonstrates that less can be more, offering the same capacity to produce impeccable coffee in a more compact format.

Also available for XL cups, for those who enjoy serving large-sized beverages.

# VENEZIA COMPACT

# VENEZIA CLASSIC

# VENEZIA CLASSIC

The Venezia Classic is the flagship of the series, designed for those who seek a complete and robust machine, ready to tackle any challenge. Equipped with the latest innovations in extraction technology, this machine allows precise control over every step of the process, from temperature to pressure. Its versatility makes it ideal for both high-volume coffee shops and those who simply demand the best. With the Classic, every cup of coffee becomes a masterpiece, delivering unmatched precision and consistency.

## PID CONTROL

Our Venezia Series features advanced PID control, allowing you to adjust the water temperature with millimetric precision. This ensures that every extraction is perfect, releasing the full flavors and aromas of your favorite coffee beans in every cup.

## LEVER STEAMER

It offers greater control over milk frothing, durability, energy efficiency, aesthetics, and the ability to create unique coffee beverages. These features make it an attractive choice for baristas and café owners looking to provide a high-quality coffee experience and stand out in the market.

## ROTARY HIGH-QUALITY PUMP

The Venezia Series is equipped with a high-quality rotary pump that ensures constant and stable pressure during every extraction. This results in a smooth and consistent coffee in every cup.

## CONFIGURABLE PREINFUSION

Pre-infusion is a fundamental technique in professional espresso machines and offers several advantages that significantly enhance the quality and flavor of the coffee. It allows for control and adjustment of the coffee extraction process before the main extraction phase begins.

## Simplicity and efficiency without complications

If you're looking for a simpler solution without compromising the quality of the Venezia Series, the Venezia Essence is the perfect choice. This version offers a more minimalist approach, ideal for spaces that require high performance without the advanced features of the higher-end models. With an intuitive and efficient design, the Essence is ideal for those who want an easy-to-use machine while still delivering the same ability to produce impeccable espresso. It's the very essence of professional coffee, in its purest and most straightforward form.

# VENEZIA TALL CUP

Specifically designed to meet the demand for XL-sized coffees, the Venezia Tall Cup features a structure that accommodates larger cups without compromising extraction quality, while maintaining all the unbeatable features and quality of the Venezia series. This machine is perfect for those who prefer more generous drinks or for establishments that offer options like cappuccinos or lattes served in larger cups. The Tall Cup ensures that each sip is enjoyed with the same precision and care that defines the entire Venezia Series.

The Venezia Tall Cup increases the distance between the tray base and the group from 8 cm to 13 cm, catering to the needs of markets like Asia and the U.S.
